

Newsletter – Fourth Edition *April-July 2021*

A lot has happened these months!

Since the publication of our last newsletter, a lot has happened in this project! Besides the pandemic, we continue working, trying to adapt to these situations of uncertainty. We are proud to say that we have been very productive! IO3 and IO4 are almost finished, and we are about to finalize the project! Here you have all important information at a glance!

IO3 results

Entitled “EAST description within the ECVET system – Standard for continuous entrepreneurial qualification”, IO3’s content is almost finalized. There are still some minor changes that partners agreed on applying on their last online meeting. This output will suggest a description of EAST qualification within the ECVET system which will aim to be a standard for continuous VET qualification on Entrepreneurship.

IO4: Almost done!

IO4 consists on the creation of EAST platform. The name of the output is “EAST platform. A unique and innovative environment – an assessment tool/self-evaluation tool for entrepreneurs”. Partners will test English platform to provide feedback on possible changes before it is translated to all partners’ languages.

Newsletter – Fourth Edition April-July 2021

IO4 Almost done!

The objective of the platform will be to deliver a unique innovative and creative environment which will provide a self-evaluation tool based on the needs that have been identified on IO1. Recommendations materials on ECVET and ECTS will be provided as well.

Next steps

We are currently finishing the last content of IO3 and IO4, which is about the OER, where all the content will be available!

Partners will carry out the last meeting in September 2021, ideally face to face if the situation allows it!

Stay tuned for more information about EAST Project!

The partnership

EAST's partnership is strategically formed by partners from five European countries (Spain, Poland, Cyprus, Greece and Italy) and from different sectors, including universities, private companies focused on training, research centers and higher educational institutions.
